

Mason Stevens Australian Fixed Income Managed Portfolio

Objective

The Mason Stevens Australian Retail Fixed Income Managed Portfolio invests in a portfolio of AUD denominated fixed income securities that aims to achieve high risk adjusted returns, while delivering regular cash-flow streams via income from coupons.

Targets regular income, distributed as coupons are received. The strategy maximises capital gains, whilst minimising capital losses.

Access high-grade, liquid, fixed income securities with a minimum rating of investment grade or higher at the time of purchase.

Direct beneficial ownership of securities.

Flexible solution that allows for the rebalancing of the underlying investment weightings in the Managed Portfolio, acting as a cushion to changing market conditions.

A solution for investors seeking:

A risk managed approach to investment with regular income and capital preservation.

A defensive investment that can provide diversification benefits when complemented with equity strategies.

A cost effective fixed income solution that offers real (inflation adjusted) return.

A better return than can be achieved from term deposits with greater liquidity.

How are the portfolios managed?

Mason Stevens Asset Management is the Investment Manager and controls the asset allocation decisions.

Security selection is conducted using thorough bottom-up credit research coupled with a strong sense of relative value and timing.

Daily management and observation of market and portfolio exposure.

Quarterly Investment Committee to discuss economic outlook, sector views and risk management.

¹ The Management Fee is calculated daily and paid monthly in arrears. Other management costs may apply.

Why invest in Fixed Income ?

- **Predictability** – The regular income stream from fixed income investments can provide.
- **Diversification potential** – Fixed income performance varies compared to equity and other financial asset markets.
- **Income generator** – Fixed income returns can provide a regular flow of income, as cashflows are known in advance of investment.
- **Risk-adjusted return** – Investing in credit can provide a repeatable and sustainable source of value in fixed income markets. Historically, investment returns from good quality credit assets have more than compensated investors for the risk of loss.
- **Less volatility** – Historically, Australian fixed income exhibits less volatility than domestic equity and REITs.
