## Why invest in Fixed Income ?

- Predictability The regular income stream from fixed income investments can provide some predictability and stability to overall returns.
- Diversification potential Fixed income performance varies compared to equity and other financial asset markets.
- Income generator Fixed income returns can provide a regular flow of income, as cashflows are known in advance of investment.
- Risk-adjusted return Investing in credit can provide a repeatable and sustainable source of value in fixed income markets. Historically, investment returns from good quality credit assets have more than compensated investors for the risk of loss.
- Less volatility Historically, Australian fixed income exhibits less volatility than domestic equity and REITs.
