## PORTFOLIO PARAMETERS

### AKAMBO CONCENTRATED CA0 PORTFOLIO

Feature	Description
<b>Portfolio Name</b>	Akambo Concentrated CA0 Portfolio
<b>Investment Sub-Advisor</b>	Akambo
<b>Inception Date</b>	March 2023
<b>Investment objective</b>	The investment objective is to achieve expected total returns in excess of CPI inflation plus 4% over rolling 5 year periods.
<b>Investment Strategy and Approach</b>	The strategy of the Investment Option is to invest in a portfolio of investments with a heavy bias toward growth assets, such as Australian and international equities. It is unsuitable for clients requiring high levels of income from their investment and for whom capital stability is a high priority. While total returns are the aim, there will be an emphasis on long term capital growth. Akambo takes an active multi-disciplined approach to achieve the performance objectives of the Investment Option.
<b>Benchmark Return</b>	CPI + 4%
<b>Minimum number of securities</b>	30
<b>Maximum number of securities</b>	100
<b>Asset allocation</b>	<b>Allocation range</b> <span style="float: right;"><b>Target Weight</b></span>

## About Akambo

Akambo is a financial advisory firm established in 2007. Akambo has a strong background in investment advice and asset management gained through many years of experience in the financial services industry.

Akambo offers individually tailored advice for self-managed super funds, individuals, not-for-profits, families and corporate clients extending across a range of financial services and products. Through its expertise in asset management, financial planning, retirement planning and strategies, insurance products, securities and derivatives strategies, it aims to provide its clients with a broad range of wealth management solutions.

Akambo is able to draw on its broad reach of research and investment products to provide investment advice for your individual investment needs, objectives and financial circumstances.

## About First Financial

First Financial is a wealth management firm specialising in financial planning and superannuation management services, based in Melbourne.

## Investment Process

### Investment philosophy

The investment philosophy of Akambo begins from the perspective that clients deserve and are seeking a transparent and flexible solution. Akambo embraces a holistic view of a client's circumstances and seek to meet their goals and objectives through best of breed solutions and products, coupled with a personalised and interactive service.

The transparency is provided through a focus on direct investments and ETFs wherever possible. This approach helps to simplify and demystify the investment experience for the client, helping to build trust between adviser and client. Akambo's investment universe is open to other alternatives where circumstances prescribe, however transparency and liquidity are critical in their selection of these.

This transparency and liquidity are supported by a primary focus on large market capitalisation companies, as Akambo believes that this transparency should also engender confidence and reassurance. Akambo achieves this by investing in large companies that are either household names or have products and solutions that a retail client can relate to. This is coupled with an emphasis on concentrated, high conviction investment portfolios.

Akambo believes that active management helps deliver a flexible, proactive, value-added overlay to their investment portfolios. This is carried out not only at an individual stock level, but through dynamic asset allocation within and across a portfolio. To this end, cash is used as a strategic tool to protect performance within a portfolio and may provide a buffer for opportunities where market conditions demand. Where circumstances warrant, Akambo can use currency hedging tools to protect portfolio performance.

Akambo aims to deliver absolute results within the tolerances of a client's risk profile, however they are also respectful of the diversity of preferences among clients. As a result an ethical filter is applied to the investment portfolios (i.e. no tobacco or gaming) and Akambo also maintain flexibility to tailor a portfolio where a client expresses other preferences.

As Akambo is self-licensed they have the freedom to draw on research, opinions and data from a broad array of domestic and global providers.

This flexibility and rigour behind the investment approach enhances the value in their client solution. This is overlaid with a local and global macro perspective, and prudent use of technical analysis, which Akambo believes enhances risk management within a portfolio.

Education and communication are also very important, as Akambo believes this empowers the client. But the challenge lies in striking the balance between meeting the client's appetite for knowledge versus overwhelming them with complex and confusing information.

The key to finding this balance comes through asking questions and routinely checking in with what the client's needs and understandings are.

## Portfolio construction

The Akambo investment process incorporates three key steps in constructing and managing its investment portfolios:

- » **Macroeconomic trends and analysis**  
Akambo start by identifying regions, sectors, and themes that appear attractive and offer compelling value or momentum. These may be driven by economic, demographic, political or strategic factors (among others), and are derived from a broad selection research, data, and critical analysis on diverse and nuanced insight.
- » **Stock identification**  
An intensive process that draws on available research and market opinions to identify the companies that are best placed to exploit these opportunities. This also incorporates the use of technical analysis to identify trends and help fine tune entry and exit of positions.
- » **Risk management**  
An overarching focus on protecting client investments remains at the heart the Akambo investment process. This involves actively managing exposures across sectors, themes and geographic regions, and the use of cash as a strategic tool. Akambo are happy to maintain higher cash weightings (within the bounds of the portfolio guidelines) in the absence of any compelling opportunities. Whilst Akambo actively tracks and measures index correlations and benchmarks, they are not bound by them.

## How the investment manager manages risk

The investment manager is unable to eliminate all investment risk, but does analyse, manage and aim to reduce the impact of risks by actively monitoring investment markets and portfolios and through the use of carefully considered investment guidelines.

## Labour standards and environmental, social and ethical considerations

The Trustee does not take into account labour standards, environmental, social or ethical considerations when making the investments available. The approach in relation to any consideration of labour, environmental, social or ethical standards as part of the investment decision making process for the portfolio is left by the Trustee to the individual discretion of the investment manager. This investment strategy does not directly measure or incorporate labour, environmental, social or ethical standards as part of the investment decision-making process.

The investment manager is aware that these issues can influence social, business and investor outcomes. In certain circumstances they may consider these issues when making an investment decision. The investment manager's consideration of labour, environmental, social or ethical considerations are in its own right and not on behalf of the Trustee.

## Execution of strategy

Mason Stevens Limited and its associated entities have been appointed by the Trustee to provide various services in relation to the Fund, including promoter, investment management and custody services. Mason Stevens and the Administrator are responsible for implementing the investment instructions of the investment manager by buying and selling assets, taking into consideration timing, trading costs (such as transaction fees and currency costs, if applicable) and the mandate of the portfolio. In certain circumstances Mason Stevens has the right to vary the Investment Option. By investing in this Investment Option, you instruct Mason Stevens and the Administrator to buy and sell assets on your behalf through the Investment Option as advised by the investment manager.

## Risks

Before you consider investing in this portfolio, it's important you understand the risks that can affect your investments. A summary of key risks is in the PDS.

See the 'Risks' section in the PDS. Please note this is not an exhaustive list of all the risks. The risks relevant to this portfolio reflect the underlying investments. For information about risks regarding your personal situation, please speak to your adviser.

## Trade notifications

When the investment manager trades, or rebalances the portfolios, Mason Stevens (through the Service) may send you an advice notifying you of the trades being undertaken. This is called a trade notification. The rebalance and reallocation of Investment Options may occur regularly and you may receive a trade notification each time a rebalance or reallocation occurs.
