About the relevant parties

About United Advisory

United Advisory is a full service advisory business that provides services across, financial planning, business advice, accounting and law.

Investment Process

The portfolios are constructed with a focus on capturing risk-adjusted returns through diverse asset allocation principles, granting the investor broad access to markets whilst also providing sufficient risk controls and uncorrelated exposures to limit overall market risk. The objective of the Portfolio is to provide a highly diverse, actively managed exposure to global markets at a low cost.

The philosophy of the portfolio is underpinned by placing a value on actively managed, strategic placement in global asset classes with forward-looking sector views. This allows advisers access to intelligently constructed and highly liquid portfolios, backed by the expertise of global ETF managers.

The Strategic Asset allocation is driven by United Advisory's macroeconomic views over a 3-5 year time frame, including; historical and projected asset class returns in current market conditions, expected market volatility for classes and sub-sectors, United Advisory's views on economic outlook for geographies and structural risk within each market sector.

United Advisory will also apply tactical tilts on a quarterly basis which will reflect United Advisory's macroeconomic views for the upcoming quarter.

How the investment manager manages risk

The investment manager is unable to eliminate all investment risk, but does analyse, manage and aim to reduce the impact of risks by actively monitoring investment markets and portfolios and through the use of carefully considered investment guidelines.

Labour standards and environmental, social and ethical considerations

The Trustee does not take into account labour standards, environmental, social or ethical considerations when making the investments available. The approach in relation to any consideration of labour, environmental, social or ethical standards as part of the investment decision making process for the portfolio is left by the Trustee to the individual discretion of the investment manager. This investment strategy does not directly measure or incorporate labour, environmental, social or ethical standards as part of the investment decision-making process.

The investment manager is aware that these issues can influence social, business and investor outcomes. In certain circumstances they may consider these issues when making an investment decision. The investment manager's consideration of labour, environmental, social or ethical considerations are in its own right and not on behalf of the Trustee.

Execution of strategy

Mason Stevens Limited and its associated entities have been appointed by the Trustee to provide various services in relation to the Fund, including promoter, investment management and custody services. Mason Stevens and the Administrator are responsible for implementing the investment instructions of the investment manager by buying and selling assets, taking into consideration timing, trading costs (such as transaction fees and currency costs, if applicable) and the mandate of the portfolio. In certain circumstances Mason Stevens has the right to vary the Investment Option. By investing in this Investment Option, you instruct Mason Stevens and the Administrator to buy and sell assets on your behalf through the Investment Option as advised by the investment manager.

Risks

Before you consider investing in this portfolio, it's important you understand the risks that can affect your investments. A summary of key risks is in the PDS.

See the 'Risks' section in the PDS. Please note this is not an exhaustive list of all the risks. The risks relevant to this portfolio reflect the underlying investments. For information about risks regarding your personal situation, please speak to your adviser.

Trade notifications

When the investment manager trades, or rebalances the portfolios, Mason Stevens (through the Service) may send you an advice notifying you of the trades being undertaken. This is called a trade notification. The rebalance and reallocation of Investment Options may occur regularly and you may receive a trade notification each time a rebalance or reallocation occurs.
